

Project: Theatre Ceiling, National Library of Latvia

Black powder coated aluminium Brocklebank 20/5 architectural mesh ceiling panels installed within a theatre at the National Library of Latvia at Mukusalas Street, Riga. The theatre ceiling was designed and supplied by Locker Architectural ready to fit to the existing steelwork structure. The ceiling effectively conceals vents, diffusers and ducting, and provides easy access for maintenance. The mesh structure means the ceiling is acoustically transparent, and the dark colour focuses the attention of the audience towards the stage area.

Material:
Brocklebank 20/5
Pre-crimped Mesh

Installation:
Suspended ceiling
panels and extrusion
