

# Architectural Wire Mesh Patterns

Architectural wire meshes, for a broad range of applications, are woven to order in Stainless Steel, Phosphor Bronze and Copper. Galvanized steel mesh is available in a limited number of specifications. **Please note: openings, free space, weights etc can be tailored to individual project requirements.**

Architectural wire mesh is woven using rigid wire or a combination of rigid wire and braided wire cable where a more flexible mesh is required.

The specifications are determined by varying the spacing between the wires or cables and through the use of different wire diameters.

Locker is a UK based supplier of architectural wire mesh products certified to BS EN ISO 9001:2008 and Achilles 'Building with Confidence' Level 4.

With comprehensive in house 3D design facilities we are able to offer a complete package from development of the architectural wire mesh specification through design, fabrication, supply and installation of the finished screens.
