All specifications are subject to manufacturing tolerances

This mesh is formed from a combination of flat and round wires. The end result is a solid, completely opaque product, more visually similar to embossed sheet metal than a woven mesh and perfect for high-end projects.

Typically available in Stainless Steel or Aluminium material.

Suitable for an extensive range of anodised finishes in aluminium material only.

Locker offer a complete package inclusive product specification development, design, fabrication, supply and installation.

[Click here](#) for further information.

Please [contact our sales department](#) to discuss non-standard materials, finishes, or any other queries you may have.
